Fixed-price bid model.	<ul style="list-style-type: none"> ▪ No hidden development costs

One of the anchor banks in Malaysia with a network of 82 branches nationwide.

Customer Requirement:

Data Migration

Business Problem

Migrated the entire data from I-flex's Finware/Flexcube products to Silverlake Integrated Banking System

Solution

- Migrates the data from three different data sources – Sybase, Oracle and flat files to AS400 database. This involved migrating data from three different data sources – Sybase, Oracle and flat files to AS400 DB2 database.
- The modules migrated were Common Customer Information File, Savings and Current account, Remittance, Auto Fund Transfer, Fixed Deposit, ATM, Loans and Trade Finance.
- Built two sets of applications – one for data mapping information captured and the other for conversion. The development also included generating statistical reports, data mismatch reports and exception reports.

Results and Key Benefits

- Data Migration was successfully undertaken within the scheduled delivery date.
