Designing technology solutions
beyond boundaries

A government owned bank in Malaysia with 382 branches and 621 automatic teller machine (ATM) nationwide.

Customer Requirement:

The study was aimed to assist the client to tap into group wide synergies in IT and Shared Services.

Business Problem:

The client wanted to explore whether a shared services company can be created to serve both the IT departments.

Solution:

The study conclusively identified that the shared services company could bring in great savings in the operational expenditure
