Producer of high quality natural rubber products for the industrial sector, the Malaysian plant producing more than 50% of the global group output exporting its products to four regions namely US, UK, Australia and Africa.

Customer Requirement:

Shipping Documentation System

Business Problem

The client has J.D. Edwards ERP solution; however, the system doesn't cater for certain types of shipping documents that were needed by the Malaysian Excise and Customs department

Solution

- Buzznet solution is integrated with the J. D. Edwards system and generates all the necessary Shipping Documents along with tracking shipments.
- Development environment: J2EE with Tomcat, Struts and JSP, SQLServer

Results and Key Benefits

- The solution assisted the client in tracking and generating documents with very limited manual work.
