## Customer Requirement:

### Consultants Electronic workspace

## Business Problem

Buzznet wanted a Project Management workbench to monitor the progress of projects and as well as build a knowledge repository of various industries to assist the development team in understanding business processes of clients

## Solution

- This application was built for Buzznet's global consulting practice, in order to accelerate delivery of solutions to customers, accelerate organizational learning and enrich an organization-wide knowledge repository.
- The electronic workspace provides each consultant, based on the role he/she plays in a particular project with a customized view of the relevant tools, tasks and knowledge he/she needs at any particular time.
- Development environment: Microsoft .NET technologies, including VB.NET, ASP.NET, Microsoft SharePoint Server, Microsoft BizTalk Server, and Microsoft SQL Server 2000.
